Google Sheets-Flubaroo

The screenshot shows a Google Sheets spreadsheet titled "1.2 Homework Check (Responses)". A Flubaroo grading tool window is overlaid on the spreadsheet. The window has a title bar "Flubaroo - Grading Step 1" and a logo. Below the logo, there is a text box that says: "Please select a grading option for each of the questions in the spreadsheet. Flubaroo has done its best to grade the test option for you, but you should check the option for each question you will." Below this text is a table with two columns: "Grading Option" and "Question".

Grading Option	Question
1 point	Find the Domain of the function (x).
1 point	Identify the range of f(x).
1 point	Classify the function as Odd/Even/Neither...
1 point	Which of the above are not functions?

At the bottom of the window, there are three dots and a "Continue" button. The spreadsheet in the background shows a list of student names and their scores for each question.

Buford
