Create a Google Classroom

- **After Creating a google classroom have students join the class using the CLASS CODE. This is located under the heading STUDENTS.**

- **Now you are ready to start adding assignments.**

Creating an Assignment

- **Under the STREAM heading click the + button that is located on the bottom right corner.**
- **You will be given several options. Choose the CREATE ASSIGNMENT icon.**
- **The assignment box will appear.**
- **You can...**
  - **upload premade documents by clicking the GOOGLE DRIVE icon.**
- **You can....**
  - **add a due date for the assignment**
  - **decide which classes you want to share the assignment with**

Assignment Options

After uploading the documents you can...

- Decide for EACH document if you want students to...
  - View it ONLY
  - EDIT as A CLASS
  - Make an individual copy for each student to turn in.

Make an assignment Copy for each student

This is just like passing out worksheets or notebook paper for each student… however you are now saving trees!!!

Choosing this option will

- Allow students to work independently on the assignment
- Allow students to turn in their work individually through google classroom
- Allow the teacher to grade the individual work and comment on the student's individual paper
- Place the document in the student's google drive

Make an assignment VIEW ONLY

This will…

- **Allow students to ONLY view and not write in the document.**
  - **This is great when you are giving a passage to read. You do not want students to write in it.**
  - **Adding another document to the assignment, that has a copy for each student, will allow them to have and answer doc to turn in after reading the "view only" document or passage.**
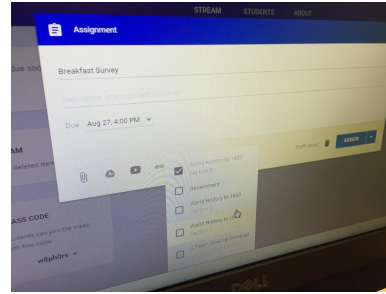

Making an Assignment -Students can EDIT

Allowing students to edit will allow ALL students to work in the same document. I would not suggest using this option unless you are having groups work together on an individual assignment.

Other Assignment options

File Upload

This allows you to upload a file from your computer. Students will not be able to edit these files.***make it a google document so students can edit

Google Drive Upload

Uploading Google Documents from your drive will allow students to edit. Great place to keep all your google classroom assignments.

YOUTUBE video Upload

Upload a video from youtube students can watch at their seats. Great for Books read on Youtube

LINK

This allows you to easily link other websites for students to view

How do I create a document?

1. Click NEW from your Google Drive
2. You will be given several options
3. Choose Google Document
4. You can make worksheets by creating, pasting a copied document...etc.. for students
5. Organize your document into the correct GOOGLE folder

USING NOVELS-
Because of Winn-Dixie by: Kate Dicamillo

Task BOARD including View ONLY and Answer Doc for each student
