Welcome to Quizlet!

Finally!
A review game your students will _BEG_ you to play!

What is Quizlet?

Quizlet provides free study tools for students, teachers, and learners of all ages that can be used in and out of the classroom, on your own or with friends, and on the go with our iOS and Android apps.

Why do students __LOVE__ Quizlet?

https://quizlet.com/testimonials

- Develops team collaboration and sportsmanship because only one team can "win".
- As a teacher, you can see right away which students on which team are having trouble.
- It is fast-paced and keeps the students' attention and keeps them motivated!
- They can study at home!

What is the difference between _Quizlet_ and _Quizlet Live?_

Quizlet is a study and practice tool. Students can study and play games on their own.

Quizlet Live is a multi person, fast paced review game. The same study sets are used as in Quizlet. This is a great tool for study guides, but there are also many pre-made quizlets ready to go for basic skills-like math facts.

Let's Try It!

Go to: www.quizlet.com/live

1. Wait for the 6 digit code to appear on the screen.
2. Enter the code and press enter.
3. Enter your first name and press enter.
4. When at least 6 students have joined, we are ready to play LIVE!
5. Watch carefully, you might not have the answer! If you click the wrong answer your team's points go back to ZERO and you have to start over!
6. The first team to earn 12 points "wins" the round.

What's Next?

Set up your own classroom and search for study sets that fit your individual class.

https://quizlet.com/help

This link on the website will walk you through step by step to individualize your classroom setting as much or as little as you would like.

Helpful Hint: If you choose to search the database to use a study set that has already been created, be sure to always preview as students can make study sets and "publish" them. I have come across incorrect answers and misspelled words on published tests.

Have Fun <u>Previewing</u> and <u>Reviewing</u> with your Classes!
